

Computer in the car
to set destination.

Its purpose is to prevent
accidents and to be a more
environment friendly.

Pro

Con

Its effects society by being really
safe. It also helps if you have a
drinking problem you can go
home without driving.

One bad thing is that it is not that
affordable because it is around \$100,000.
Also i don't think that many people care
about a self driving car

Crash Rate per 100 Million Miles
